

Curtains

DIY Measuring Templates

To help you measure accurately for your new sheer or blockout curtains, we have developed the below templates. Simply print them onto paper or lightweight card, then cut the shapes out as indicated by the dashed orange lines.

Used in conjunction with our How To Measure videos, these templates will ensure you get the best possible result when measuring for your curtains.

DIY Measuring Templates

To help you measure accurately for your new sheer or blackout curtains, we have developed the below template. Simply print it onto paper or lightweight card, then cut the shape out as indicated by the dashed orange line.

Used in conjunction with our How To Measure videos, this template will ensure you get the best possible result when measuring for your curtains.

Please ensure you print this page out at 100% size. Check your printer settings and do not scale the printing down. Once printed, check that your measurements match those shown here.

Cut around the dashed orange lines to get your final templates.

Template 3

Corner Template

For external corners

For use with template #1

**You will need 1 of these*

90mm

**Circle diameter is therefore 180mm*
