

## CHECK MEASURE SHEET – Plantation Shutters

Room name	Width (mm)	Drop (mm)	Panel layout	# of panels	Width to T-post-1 (if applicable)	Width to T-post-2 (if applicable)	Width to T-post-3 (if applicable)	Mid rail (make sure to note if it is critical)	Split tilt	Mount (in/out)	Frame type (L frame inside, Z frame, U channel, Direct mount, or L Frame outside)	# of frame sides (3 or 4)

## Information Key:

<b>Panel layout:</b>	Layout A - L
<b># of panels:</b>	1 • 2 • 3 • 4 • 5 • 6
<b>Widths to T-post:</b>	Enter in your measurements* (mm) to each T-post as per your selected layout (if applicable) <i>Always measure from left to right. * Refer to Panel Layout Chart for guidance.</i>
<b>Mid rail:</b>	No mid rail • Centre • Other* (enter mm) • Critical (enter mm)** <i>*Always measure from the bottom of the window sill up to where the centre of the midrail will sit.</i> <i>** A critical mid rail is one where the location needs to be exact. Please measure as above and note on your order.</i> 1 x Mid Rail is required for drops > 1600mm. This adds stability to the panel.
<b>Split tilt:</b>	Split half • Split half above mid rail • No thanks <i>A Split tilt will come standard for any panel drop &gt; 1200mm without a mid rail.</i>
<b>Mount:</b>	Inside mount • Outside mount
<b>Frame types:</b>	<b>Inside Mount:</b> L Frame • Z Frame • U Channel • Direct Mount <i>(only applicable for Layouts A, B or C)</i> <b>Outside Mount:</b> L Frame
<b># of Frame sides:</b>	3 • 4
